

CITY OF LODI

COUNCIL COMMUNICATION

AGENDA TITLE: Public Hearing to Consider Adopting the Update of Lodi's Urban Water Management Plan

MEETING DATE: July 18, 2001

PREPARED BY: Public Works Director

RECOMMENDED ACTION: That the City Council conduct a public hearing to consider the adoption of Lodi's updated Urban Water Management Plan.

BACKGROUND INFORMATION: During the 1983/84 Regular Session, the California Legislature enacted Assembly Bill 797, and as amended subsequently, created Water Code Section 10610, et seq., known as the Urban Water Management Planning Act. This Act requires the City of Lodi to review and update the Urban Water Management Plan every five years. This is the third update of Lodi's Urban Water Management Plan. The adoption process requires a public hearing and adoption by the City Council.

The updated Urban Water Management Plan was prepared by staff with the assistance of Brown & Caldwell, an engineering consulting firm. The plan updates Lodi's historical and projected population and water use, and analyzes Lodi's sustainable groundwater supply quantity. The plan also reviewed fourteen water conservation best-management practices of which six were analyzed in more detail for economic feasibility.

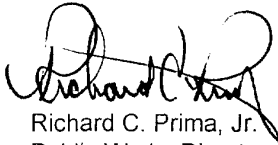

A copy of the draft Urban Water Management Plan was included with the Council Communication for setting the public hearing. Two published notices of public hearing announced the availability of the draft plan and the date of this public hearing.

The "Conclusions and Recommendations" (Chapter 7) from the Plan are attached. As part of adopting the Plan, staff is seeking specific policy direction in several relatively new areas. They are:

- 1) Continue our participation in County-wide efforts to provide supplemental water to the area, but also work to identify conjunctive use or other projects that will reduce Lodi's groundwater consumption to sustainable levels.
- 2) Direct staff to work with the Planning Commission on development of mitigation measures to reduce the impact to the groundwater caused by new development.
- 3) Begin installing and reading water meters on all new development.
- 4) Begin installing and reading water meters on developments that have paid for meters, but have not yet been installed.

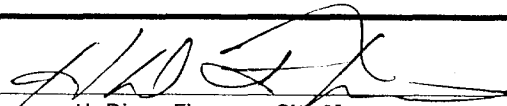

The costs to the City of the last three policy directions are essentially zero, as they are paid by new development. The potential for future cost savings in reduced need for additional supplies is significant. The cost to read the meters, at least for the next few years, is minor and can be handled with existing staff. (The meters use "touch-read" technology—the meter reader touches a hand-held wand to a button on top of the meter lid and the reading is recorded electronically, then downloaded to the computer.)

FUNDING: None required.

Richard C. Prima, Jr.
Public Works Director

Hearing*

CHAPTER 7

CONCLUSIONS AND RECOMMENDATIONS

Based on the results of the evaluation conducted in this report, the following recommendations are made.

1. While the water supply is adequate to address average years, dry years, and multiple dry years, the groundwater basin is in a general over draft condition. The City should take steps to develop a conjunctive use program to reduce the overall pumping of groundwater.
2. At this time, it does not appear feasible to partially meet water demands in the City's water service area through use of recycled water. The estimated \$7.8 million cost of installing pumping facilities and a pipeline to convey recycled water to the service area from the wastewater treatment plant is considered to be expensive at this time compared to the cost of available groundwater. The City should reassess this issue in 5 years and continue to provide recycled water for reuse on lands surrounding the White Slough Water Pollution Control Facility to minimize the amount of groundwater pumping in the region.
3. Continue with current water conservation efforts. Consider implementing the cost effective BMP 5 (Large Landscapes Conservation Programs and Incentives), BMP 9 (CII Conservation), BMP 14 (Residential ULFT), and BMP 4 (Metering of Residential Customers). The City should explore partnering with other utilities and funding opportunities to help implement water conservation BMPs.
4. Track the development of upcoming drinking water standards that may impact the groundwater supply. These standards include arsenic, radon, and the groundwater rule.
5. To maintain groundwater supply capacity, the City should rehabilitate or replace any older water mains and wells as they reach the end of their useful lives.
6. Establish a process to measure water savings resulting from BMP implementation.
7. Establish a process to keep a record of BMP implementation.

Mexico's other war: Ba

MEXICO CITY (AP) — In scenes reminiscent of the war on drugs, hundreds of police in flak jackets and helmets are raiding the mountains to defend Mexico's rapidly disappearing forests.

As in the battle against drugs, casualties are beginning to mount and new President Vicente Fox faces a legacy of corruption and tolerance of an activity that threatens to tear Mexico apart.

Police have found camps of heavily armed loggers who are willing to riddle forestry vehicles with bullets, shoot officials and mow down environmental activists.

In a bid to slow the steady stream of trucks carting away the old-growth pine and cedar from Mexico's mountains, three months ago the president declared deforestation a "national security issue."

By April, in conjunction with local authorities, his administration ordered large-scale raids against illegal logging in several states. But the loggers have proved they'll fight back.

They struck on May 4, high in the fir and pine mountains of the Pacific coast state of Oaxaca. Two men walked into a bar in the town of Putla, took out pistols and shot to death Fidel Bautista Guerrero, a 33-year-old Mixtec Indian.

"Fidel had organized Indian farm-

ers to conserve the forests, to harvest them more moderately, and to share the profits," said Vidal Ramirez, Oaxaca state spokesman for Bautista's leftist Democratic Revolution Party.

"The gunmen followed him, and when they found him, they didn't say a word. They just opened fire," Ramirez said.

State police pursued the killers to the ranch of timber baron Efraim Cruz Bruno, where they arrested eight men armed with AK-47s and other rifles. Cruz Bruno remains a fugitive.

"According to our investigation, Cruz Bruno ordered the killing because he felt Bautista was interfering with his business," said Eric Ares Velazquez, spokesman for Oaxaca prosecutors.

"Often, the businessmen who buy illegal timber are also involved in other activities and they are often accompanied by armed gangs," Ares Velazquez said.

Some of the violence is caused by drug traffickers who are willing to kill to protect crops hidden in forests on public land, or who cut trees to grow drug crops.

Communal farm groups, often Indians, control 80 percent of Mexico's wooded areas and they frequently suffer tree poaching from neighboring communities or local political bosses.

U.S. sergeant under suspicion of rape

OKINAWA CITY, Japan (AP) — An American Air Force sergeant was under suspicion Friday in the alleged rape of a Japanese woman on Okinawa island, Pentagon spokesman Lt. Cmdr. Jeff Davis said.

As many as seven other U.S. servicemen also were questioned about the attack, most as possible witnesses, Davis said. Deputy Defense Secretary Paul Wolfowitz said a number of servicemen had come to the woman's aid.

The alleged rape early Friday cast a shadow over talks scheduled for Saturday between Japanese Prime Minister Junichiro Koizumi and President Bush at Camp David. Reductions in troops on Ok-

spokesman for the Okinawa prefectural (state) police.

The attack took place in a parking lot in Chatan town in an area of restaurants and bars known as "American Village," not far from several U.S. military bases.

Efforts high to lower migrant deaths

MEXICO CITY (AP) — Intensifying efforts to stem the tide of migrant deaths, the Mexican government has announced that border agents will dissuade migrants from crossing into the United States through high-risk areas.

The announcement complies with a joint pledge by the Mexican and U.S. governments to create "more orderly" migration over the border.
